HubSpot CRM specialist & Senior CMS developer

CraftBent Solutions | 2021 - 2023

SKILLS

Frontend Languages: HTML5, CSS3, JavaScript, HUBL

Frontend Frameworks/Tools: React , Bootstrap , jquery , Tailwind Css , vscode , Netbeans , npm , Git , Webpack

Backend Languges: Nodejs , Express js , Data Management, Contact Segmentation, Reports & Dashboards

Other Tools: Git, Figma, ClickUp, Google sheet & Apps Script

CraftBent Solution is a service provider organization & At CraftBent Solutions, I led the development of various web and CRM projects, while managing a team of developers and interns. My responsibilities included overseeing HubSpot CMS development, CRM integrations, Zapier automation workflows, and various other custom solutions. I also handled Google Sheets and Google Apps Script integrations, as well as Jotform setups for seamless data collection and automation.

Key Responsibilities:

Led the web development team in building responsive, dynamic websites using HubSpot CMS and custom modules.

Managed the HubSpot CRM setup and integration for clients, including data migrations, custom properties, and pipeline configurations.

Developed and optimized multi-step Zapier automation workflows, streamlining operations across marketing, sales, and support teams.

Integrated Google Sheets with Google Apps Script to automate data processes, reporting, and project tracking.

Managed custom form integrations with Jotform, enabling seamless lead capture and automation.

Provided mentorship and leadership to interns and junior developers, ensuring high standards in project execution.
